RECOMMENDED ENTITY High confidence

Delaware C-Corp

NovaCraft AI is a venture-scale, equity-financed deep-tech startup raising on SAFEs. A Delaware C-Corp is the investor-standard structure and a prerequisite for your current round.

- Equity-financed
- 2 founders
- Deep-tech IP
- Raising a SAFE round
- US-based

⚠ University-originated IP detected — resolve assignment with the tech-transfer office before signing formation documents.

☒ **Delaware C-Corp**

RECOMMENDED

Standard structure for venture-scale, equity-financed startups. Expected by seed investors and required for SAFEs, priced rounds, and QSBS.

- ✓ Investor-standard · SAFEs and priced rounds
- ✓ Enables option pool + QSBS eligibility
- ⚠ Double taxation until profitable

☐ **Public Benefit Corp**

A C-Corp variant that binds a public benefit into governance. Fits when mission is central to company identity and investor narrative.

- ✓ Mission locked into charter
- ✓ Still venture-fundable (Delaware PBC)
- ⚠ Extra reporting; some investors cautious

☐ **LLC**

Best for cash-flow, services, or studio businesses not raising venture equity. Simpler tax, but not suited to SAFEs or standard equity financing.

- ✓ Pass-through tax · simple admin
- ⚠ No option pool / QSBS
- ⚠ Investors will require conversion later

- ⓘ Why not the others: an LLC blocks standard SAFEs/priced rounds and QSBS; a PBC is fundable but adds reporting and isn't needed unless public benefit is core to your identity. C-Corp keeps the round clean.
